

Culture Change Coalitions

As of July 2018

The primary purpose of the culture change coalitions is to advance culture change in their respective states or regions (some state coalitions also have regional coalitions or groups affiliated with them). Coalition activities often include educational programs and networking meetings for providers; education and involvement of consumers; communications including a newsletter and a website; and education of policymakers and regulators about culture change.

For more information on starting a Coalition or for questions about Coalitions, please contact Cathy Lieblich at cathy.lieblich@pioneernetwork.net or 321-277-7309. If you are interested in being involved in a culture change coalition or in learning more about them, please see the contact information below.
